

MODEL INFO/PRICE LIST 2026

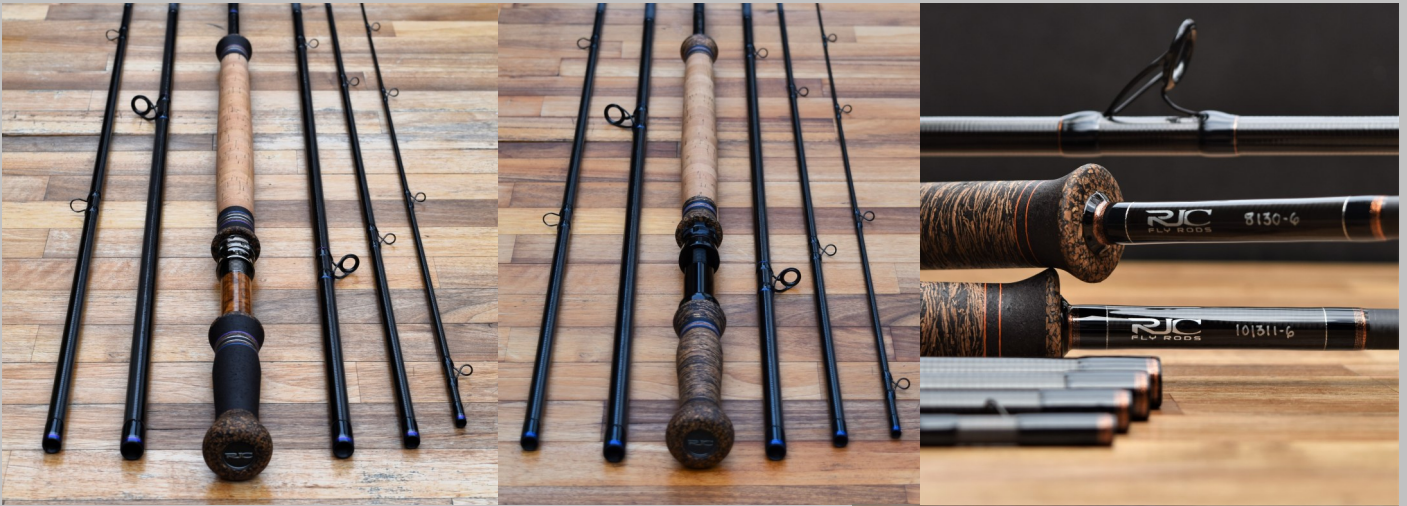

www.rjcflyrods.com

Designed & manufactured from the raw material to the final coat of finish in the UK.

www.rjcflyrods.com

All our rods are custom built to order, a plethora of design options available...

We can build as understated or adventurous as you like.

Choice of reelseat/handle design/component colour & thread wraps.

www.rjcflyrods.com

The pinnacle of performance & reliability

- Utilising industry leading carbon fiber & resin systems
- Our own proprietary rod tapers/actions
- Proprietary ferrule construction for better energy transfer, enhanced friction & strength
- Optimal fiber alignment process
- Highest quality build standard & components

TWO - HANDED MODELS

The Perfect Combination.... For the experienced or novice fisher seeking a rod that can do it all, skagit-scandi-spey with ease. A deep flexing taper or some might say progressive flex with fast recovery, opens a whole new world in performance and usability. Matched with our complex fiber layup which aids stability, strength & lightness, the rods really are a joy to use and made to last a lifetime!

Line ratings.... For Scandi & Skagit line weight windows the majority of us would be comfortable with the middle number when matched with modern day aggressive line tapers. If you're a novice then a little more weight can always help rod load. If speyline (60ft+) are your game, add around 6Gr per ft above 40ft or match to the AFTM number.

SINGLE OR TWO HAND MINI SPEY MODELS 4&5 PIECE

Can be set up with a fixed spey grip or interchangeable butts for the option of one handed use.

Interchangeable butts: Rod at advertised length with fighting butt in place, add 2" to the overall length when using the spey butt. I.e. 11' becomes 11'2".

Note: Some lines on the market are single hand rated/some spey rated, use the grams/grains window to avoid any confusion when it comes to line suitability for speycasting use.

MODEL	LENGTH	LINE rating Single - Spey	SEC' LENGTH	SCANDI	SKAGIT	PRICE £
7110-5	11' (5pc)	7/8 - 5/6	28.25"	17- 21g (265 - 335Gr)	280 - 360Gr	710.00

6100-5	10' (5pc)	6-7 - 4/5	25.75"	15 - 19g (235- 300Gr)	240 - 325Gr	700.00
7100-4	10' (4pc)	7/8 - 5/6	31.75"	17 - 21g (265- 335Gr)	280- 360Gr	660.00

SINGLE HANDED MODELS

Action... At the forefront of our mind is designing fishing rods rather than stiff tip actioned pokers, the actions could be generically described & measured as med-fast. Constructed using multi modulus fiber layup & x technology to aid torsional support, thus producing a smooth, stable & lightweight rod blank, which possesses a good amount of feel.

Line Rating... If you're an aggressive hauler and throwing a full line every cast then the bottom line number will suit, if you like a rod to feel loaded with minimal effort then the higher line number will suit.

Note... Being in control of the manufacturing process, gives us the option of altering flex in a certain part of the blank to suit a required purpose or preference, let us know your intended use or preference and we are more than happy to advise and even alter to suit.

WARRANTY...

We've grown as a company based on word of mouth and product quality rather than marketing & hype, all our designs have been thoroughly developed and tested for performance and durability. We want our rods to be timeless and last a lifetime of fishing and memories, we're in no rush to introduce new ranges every few years, carbon & resin technology isn't moving on as quick as some might have you believe! All our rods carry a lifetime warranty to the original owner, and manufacturing the blanks in house we'll replace any accidents & mishaps at minimal cost, as long as we're still breathing!

ORDERING...

At this stage you may have a model/design in mind, if not we offer a personalised service to discuss your requirements via email/telephone/messenger etc. You can talk directly to the person building your dream rod, who can offer advice on models to suit certain rivers or techniques. If your requirements fall outside what we already offer under build options, then we are more than happy to discuss your thoughts.

We will have a number of rods built and ready to try at any given time, please contact us to discuss getting a rod to you for a trial.

Once you are happy to proceed with your order, we will provide a build schedule for your confirmation. Then we generally take a 25% deposit to secure your place on the waiting list, with the balance to follow on the rods completion.
